Experience

BNA Robotics / Freelance UX/UI Designer

Feb 2019- Present | Remote

Working with client and developers on designing the experience and interface of the Windows application of the company. Responsible for creating product concepts and research, leading various stakeholder interviews, making user flows, sketches, and visual designs from the beta to the final version of the product

Shortfundly / UX/UI Design Intern

July 2018-January 2019 | Remote

Worked in collaboration with the design and development teams with agile methodology on various Shortfundly products. Responsible for the design of Mobile and TV Android apps by creating product concepts and research, leading various stakeholder interviews, making user flows, sketches, and visual designs for features of the experiences.

Pick A Bite / UX/UI Design Intern

May 2018-July 2018 | Amritapuri

Worked on redesigning the existing website and designing the mobile Android app whilst collaborating with co-student developer interns. Conducted basic research and designed the experience by delivering various user flows, sketches, and a complete working prototype.

Education

Amrita Vishwa Vidyapeetham / B.Technology, Computer Science

2016 -Present | Kerala

Projects

Lollypop Designathon 2019

One of the 32 individuals in India to be selected for the event. Was a part of a team of 6 including 2 mentors from the studio. Crafted the experience via multiple brainstorming sessions and sketching which helped in creating an interface for integrating the sponsorship opportunities platform to the existing one. Collaborated using PS, XD, Sketch and finally presented the final design to the jury.

Include the exclude option

A self-initiated research based on the way one filters through products to arrive at a possible option and enhancing the UX. The idea is to involve the exclude option during this filtering process to enhance the user experience and at the same time benefit businesses with lesser coverage and brand identity.
